

Welcome to  
the Future

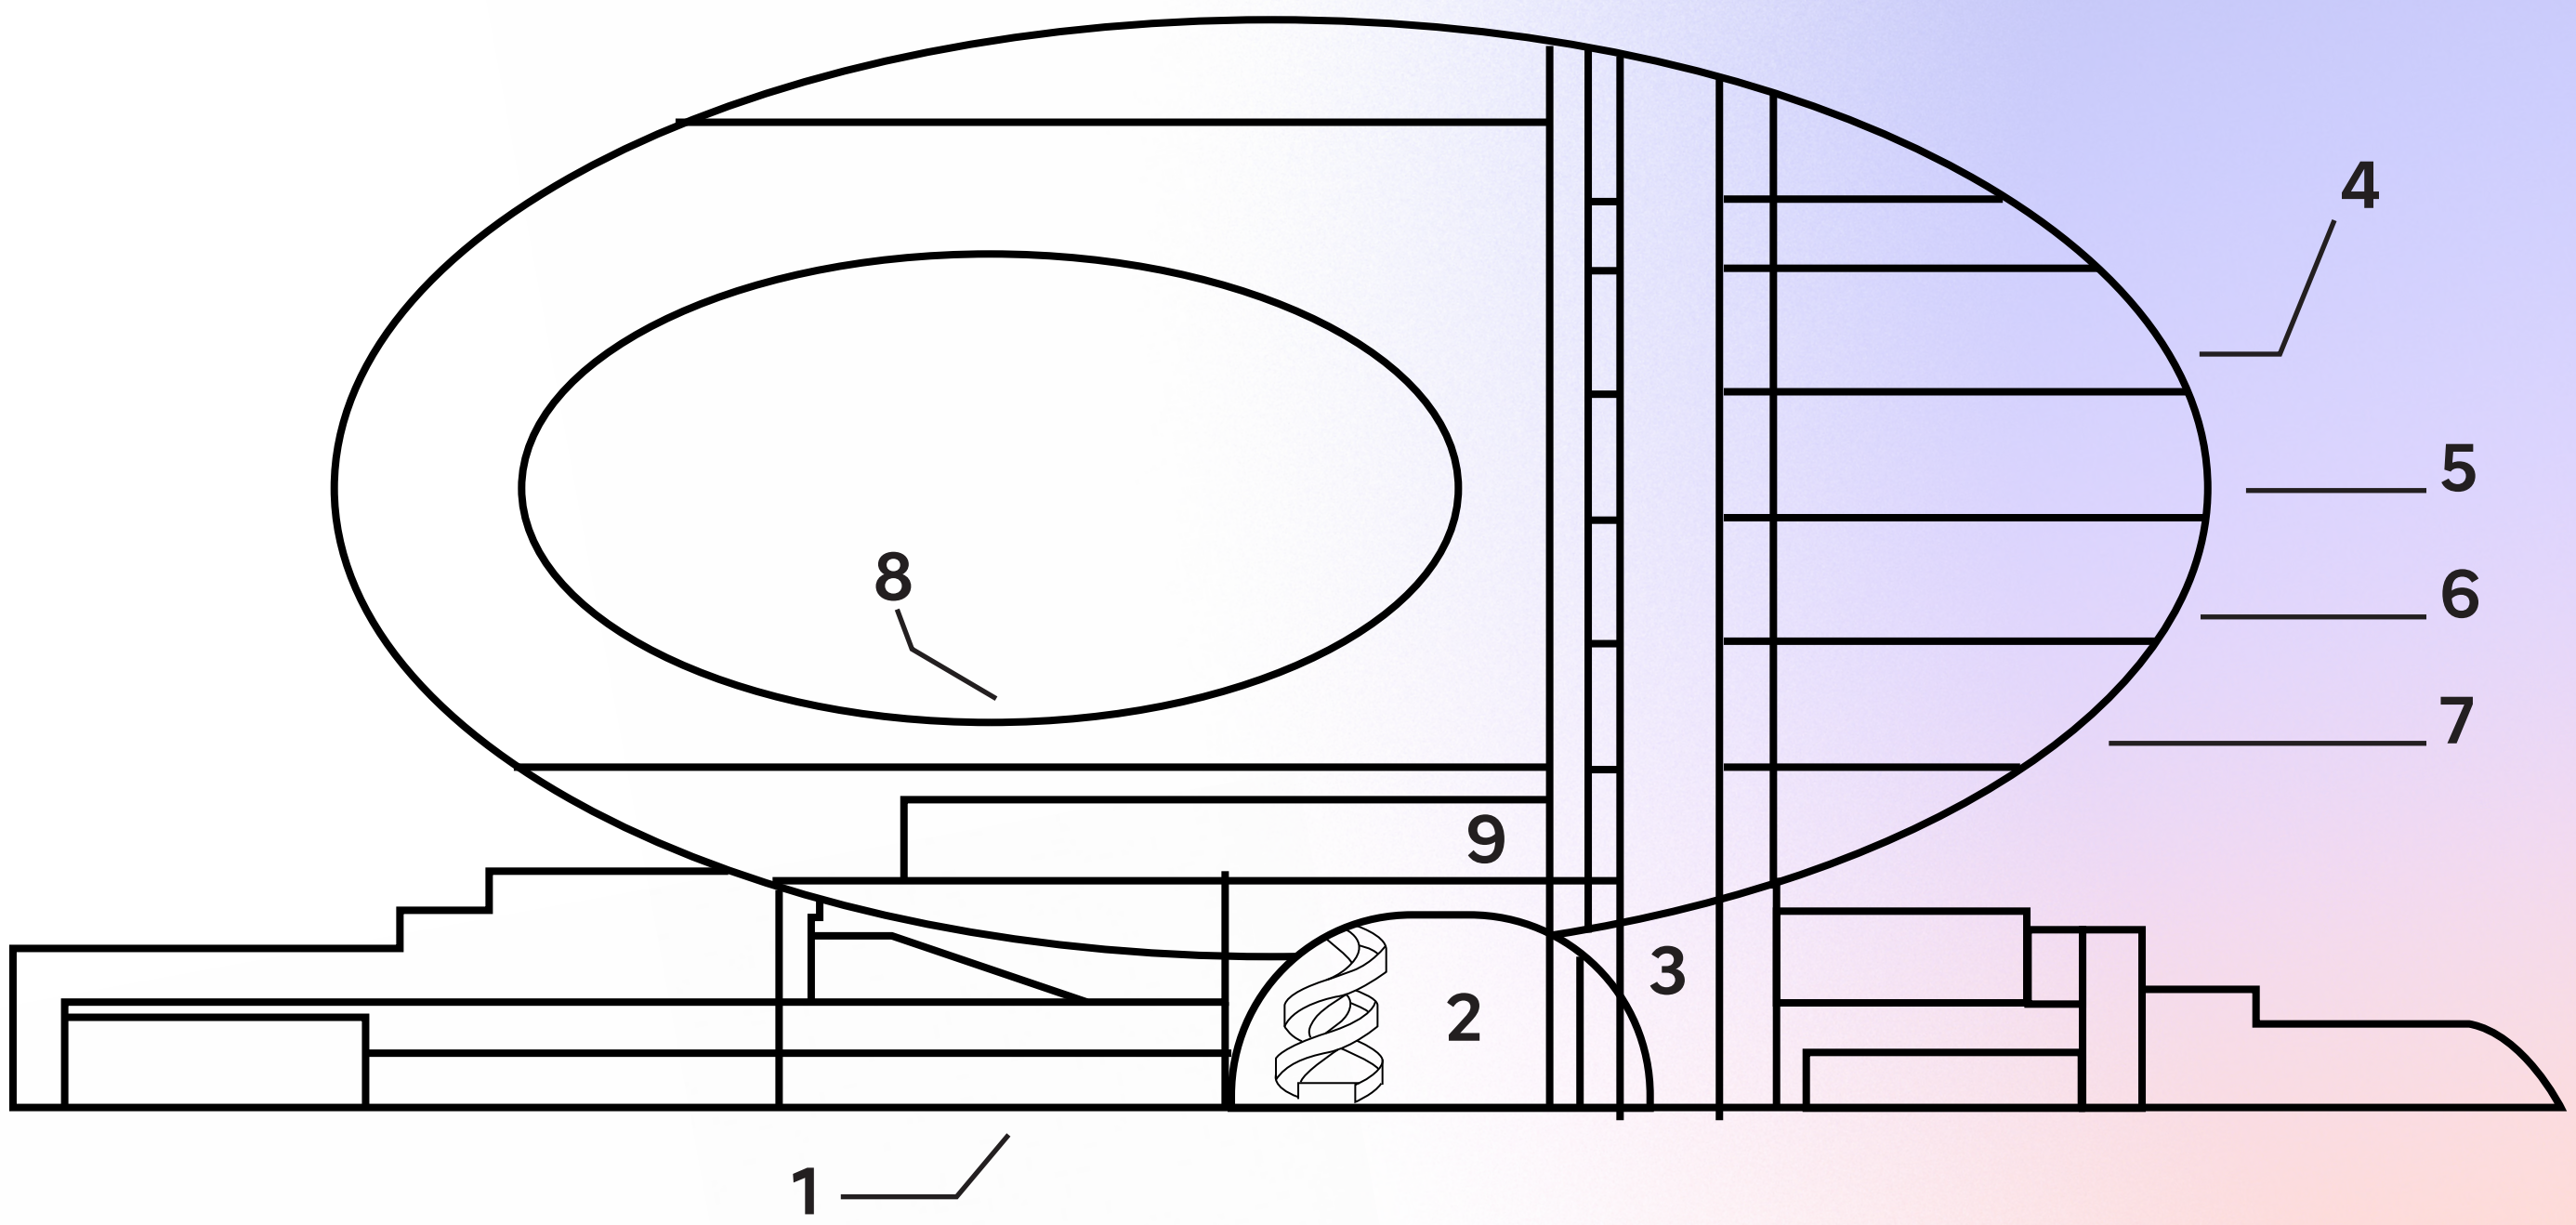

# Where a better vision for the whole world lives

Dear Pioneer,

Embark on a journey to the year 2071. From outer space to the most intricate details on planet Earth, discover the role you play in the world of tomorrow.

Witness future technologies and enter a unique place for future generations.

# Let the journey begin

Dear Pioneer, get ready to leave the present behind and enter the year 2071. Every detail is created to let you live the future through distinctive themes and innovative concepts.

# Say hello to Aya

On your journey into the unknown, you will be accompanied by someone special. Aya, the Museum of the Future's digital resident. She will help orient you to new places, show you how to interact with unfamiliar objects and make sure that you return to present safely.

# Take Off

To begin, you will voyage to a space station 600 kilometers above the earth. Departing from Mohammed Bin Rashid Spaceport in the year 2071, you can gaze through the windows of a Falcon Space Capsule and witness how Dubai has evolved, before eventually arriving at humanity's home among the stars.

The background of the page is a dark, futuristic space station interior. On the left, there's a curved wall with a grid-like pattern of small, glowing orange lights. In the upper part, there are some technical panels and equipment, one of which has the text 'ALPHA 01' visible. On the right, a large circular window looks out into space, showing a bright crescent moon and a field of stars. The overall lighting is dim, with the primary light source being the moon and the grid lights.

Chapter 1: OSS Hope

# Inhabit the Skies

In the first chapter of your journey, you will visit OSS Hope and learn about the community of Pioneers living and working there. Here you can observe the missions they undertake, study the things they invent and discover, and gaze upon the inspiration for it all - our beloved planet Earth.

Chapter 2: The HEAL Institute

# Explore a Library of Life

In the next chapter of your journey, you will visit a DNA library of thousands of species, where you can explore, collect and contribute to the wonders of nature. With the help of the institute's researchers, you can discover new species and participate in a global effort to repair the damages of climate change.

Chapter 3: Al Waha

# Revive your Senses

The final chapter of your journey to 2071 takes you to a sanctuary from digital life. Here you will experience the future of wellness, where you are encouraged to disconnect from technology and reconnect to your mind, body, and spirit.

Near-future Technologies

# Tomorrow Today

Explore groundbreaking innovations in this ever evolving exhibition of inventions and consider some of the big questions that will define our future.

This exhibition is made in collaboration with the Museum of the Future's strategic partners.

# Viewing Deck

Capture a fascinating view from inside the museum at our exclusive observation deck.

A truly extraordinary part of your journey.

Future Heroes (Ages 10 and below)

# A Playground of the Future

This exclusive space is dedicated to the young pioneers of tomorrow. It is a landscape of learning and play, where children are introduced to future-proof skills such as communication, collaboration and creativity.

# Your journey doesn't end here

As you return to the lobby, stop by The Shop and take home a memory of your visit.

Discover your unique fragrance at Algorithmic Perfumery, a unique concept brought to life by AI.

We hope you  
enjoyed your journey  
into the Future.
